

Woodturners of the Virginias Mount Jackson, Virginia

a chapter of the American Association of Woodturners

In December the club presented our outgoing President; John Andeson, with an award for his service. Many thanks John for the work you have contributed to make our club stronger and giving us a path to grow.

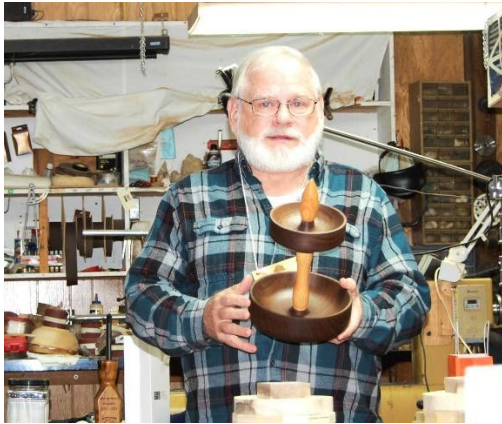

Charlie Wortman continues to impress the group with his work. He shared his work from bowls to finials. Thanks Charlie.

Steve shared some bowls and half dimensional turns. Steve always impresses with new design ideas.

Tony G stacked them high with his tiered server of walnut and cherry.

Richard Allen demonstrated the use of a laser guided hollowing system. The system helps to ensure a consistent wall thickness. Thanks for sharing some new technologies for turning.
